Targetbay Installation Instruction

Follow steps by steps as below to get it done for magento site.

- 1. Download the `Targetbay_Tracking.zip`
- 2. Unzip the zip file into Magento root directory.
- 3. Enter the following at the command line:

if the website is in production, you need to enable the maintanence mode.

- 1. php bin/magento maintanence:enable
- 2. php bin/magento setup:upgrade
- 3. php bin/magento cache:clean
- 4. php bin/magento maintanence:disable

4. To check/confirm TargetBay extension has been installed. Go to **Stores >> Configuration >>Advanced >> Advanced**, the module will be shown in the admin panel

5. Go to the **System -> Configuration -> Tracking configuration,** Enter the Targetbay Api Token and Api Index.

6. If you want you can enable the cache in admin. **Go to System >> Cache Management** and **Enable** the cache.

Configure Magento REST API Settings

- 1. Login to your Magento Admin and navigate to **System > Extensions > Integrations**
- 2. Click on Add New Integration.
- 3. Complete all details in the Integration Info tab:
 - •Name: SomeUniqueIntegrationName

DASHBOARD	New Integration		Q	📫 🕹 admin 🗸
\$ SALES			← Back	Save 🔻
PRODUCTS	BASIC SETTINGS	General		
برا Marketing	Integration Info	Name *		
	API	Email		
		Callback URL	Enter URL where Oauth credentials can be sent when using Oauth for token exchange. We strongly recommend using https://.	
SYSTEM		Identity link URL	admin URL to redirect user to link their 3rd party account with this Magento integration credentials.	
<i>.5</i> 65,		Current User Identi	ty Verification	
		Your Password *		

•Add permissions as desired on the API tab

4. Select the **Save and Activate** option from the drop down menu.

5. A pop-up window displays, confirming API permissions. Click **Allow**. (Make sure your browser allows pop-up windows.)
